

# TOTAL TRACK & TRACE SOLUTION

For Pharmaceuticals

Oscan+

## Oscan Plus

Secure Your Brand > Empower Your Patients

Oscan+ transform every product package into a secure digital asset, creating an unbreakable link of trust from your production line directly to the hands of your patients.

### Key Features

#### ✔ Interactive Product Verification

Empower your customers to instantly verify product authenticity. With a simple smartphone scan, patients are prompted to enter the batch number from the package, confirming a match against your secure records in real-time. This interactive step turns your customers into brand advocates.

#### ✔ Multi-Layered Security

Create a formidable barrier against counterfeits by integrating digital and physical security. Oscan+ supports not only unique QR codes with checks like Scratch-off codes and verification.

#### ✔ Enterprise-Ready & Secure

Designed for the complexities of the pharmaceutical industry, Oscan+ supports multiple companies, brands and product lines under one secure umbrella. Each company's data is strictly segregated, ensuring complete confidentiality and control.

#### ✔ Intelligent Counterfeit Detection

Oscan+ AI-powered analytics dashboard monitors scan data globally, automatically detecting suspicious patterns like impossible travel, scan clustering and geographic anomalies. Receive real-time alerts on potential counterfeit hotspots.

#### ✔ Complete Supply Chain Visibility

Track items from the factory pallet to the pharmacy shelf with advanced serialization and aggregation. Identify product diversion and ensure your products are where they're supposed to be, every step of the way.

### Why Choose Our Platform?

- **Protect Your Revenue & Reputation**

# Reevsense

Software & Customized IT Solutions for  
Pharmaceuticals & Healthcare Industry

## About Reevsense

Reevsense Technologies is a software and application development company offering ready to use solutions to customized product as per specifications. Our cross functional team with subject expertise, develop products in compliance with latest regulatory guidelines and audit trails.

### Why Reevsense is the preferred choice

- *Subject Matter Expertise in Pharma*
- *Data Integrity & Encryption*
- *Quick Support & Resolution*
- *Regulatory Compliance, Audit Trail*
- *Proven & Established Products*
- *Value for Money*

## Products : Cloud + On-Premises

### Oscan+

Track & Trace Solution for Pharma & Healthcare

### E- BMR

Electronic Batch Manufacturing Records Software (eBMR) with Pharma flow

### Prissm

Pharma Warehouse and Inventory Management system with QA / QC approvals, status labels printing

### Labelstack

QR Shipping Labels, Status Labels & Label Designing

### ReeDocs

Pharma Document Management System with audit log, secured access, retrieval, data encryption

### Siscom

Self Inspection and Compliance Audit Checklist Software for manufacturers as per latest regulatory guidelines

## Customized Software Development

### Manufacturing

- Manufacturing Execution Systems (MES)
- Quality Management Systems (QMS)
- Enterprise Resource Planning (ERP)
- Inventory Management System (IMS)
- Document Management & Access (DMAS)

### R&D

- Electronic Lab Notebooks (ELNs)
- Research Data Management (RDMS)
